Zurich, 21 June 2018

### Vocational training at ETH Zurich uses "time2learn" by CREALOGIX

**In future, vocational training at ETH Zurich will utilise the "time2learn" training planner by CREALOGIX. The flexible cloud solution will be used for all career paths offered at ETH Zurich. The clearly organised learning manager enables learners to receive targeted support. ETH vocational training is thus increasing transparency and quality during training.**

ETH Zurich's vocational training will gradually introduce the CREALOGIX "time2learn" training and learning platform from the start of the training period in summer 2018. The aim is for "time2learn" to manage learners' data. The solution will simplify the planning of basic vocational training. "When choosing our future digital learning platform, it was important to us to have an overview of all 15 of our professions and to thereby standardise processes. CREALOGIX supports us in this goal and offers our learners and vocational trainers added value thanks to this standardisation," says Thomas Crameri, training officer at ETH Zurich. Vocational trainers at the university will be able to use the cloud solution to easily create staffing plans and training programmes. They will also be able to handle the entire training management process directly on the platform. Moreover, they will have seamless access to learning documentation and will be able to prepare and evaluate trial and education reports and make them available to learners online. Changes to the training plan specifications are incorporated directly by CREALOGIX. The topics of data security and data protection are also professionally covered by the platform operated in Switzerland. The eDossier enables vocational trainers and learners to store all their training documents in a central location and to control access. A module on occupational safety is also planned, which will fulfil the requirement to provide evidence of training measures for hazardous work. "We will be pleased to welcome ETH Zurich's vocational training as one of our future customers. Our guiding principle is to map training processes as efficiently as possible, while always taking into account the specific needs of our customers. "time2learn" fully covers the current requirements of basic vocational training and is ideally equipped for the future with the new Version 10," says

Roland Gmür, Head of Vocational Education at CREALOGIX Switzerland, while discussing the gradual roll-out.

***About CREALOGIX***

*The [CREALOGIX Group](#) is a Swiss Fintech 100 company and is among the global market leaders in digital banking. CREALOGIX develops and implements innovative fintech solutions for the digital bank of tomorrow. Using the products from CREALOGIX, banks can react to evolving customer needs in the area of digitalisation, enabling them to hold their ground in a very demanding and dynamic market and remain one step ahead of their competitors. The group, founded in 1996, has around 550 employees worldwide. The shares of CREALOGIX Group (CLXN) are traded on the SIX Swiss Exchange.*
